

Initiate ARC Request

Homeowners in the Villages of Garrison Creek (VGC), not unlike homeowners everywhere, are always wanting to improve their front yard landscaping and the exterior of their home. The VGC homeowner, however, must first contact ARC before making exterior changes/improvements to their homes. These improvements may involve plants, trees, fences, paint colors, storage sheds, front porch furnishings, roofing, solar systems, etc. It is necessary for the homeowner to contact ARC in these instances for consultation and approval to ensure that your planned enhancements are in concurrence with the VGC CCRs and Bylaws.

Initiating a request to ARC is easy, just send an eMail stating the request to the Architectural Review Committee (ARC) (villagesARC@gmail.com). Upon ARCs receipt of the request the homeowner will be contacted to discuss the request, additional details, and any necessary city permits.

For background information, the homeowner should be familiar with the current “VGC Land Use Standards”, and “VGC Bylaws”. Copies of these documents are available on the VGC website, or can be obtained from your Phase Leaders
