Greetings Village of Garrison Creek Residents

Our hope is that this finds you well and safe. Although the pandemic has touched each of our lives in various ways, we are encouraged to know that currently none of the residents have been diagnosed with Covid-19. The ongoing situation has brought innumerable changes to our lives and our Villages. Our objective is to maintain and provide a safe outdoor environment for **all** to enjoy.

You may have noticed the recent addition of several types of signage. We agree they are annoying and disrupt our tranquil community. They are intended to be temporary, providing reminders that will enable us to maintain and provide a safe outdoor environment for all.

During our quarantine we have seen increased usage of our property. There has been a substantial increase in walkers. Some of this increase has included bicycles and skateboards on the walking paths. Our narrow sidewalks and paths were not designed for this usage, and their presence creates a hazard. **Signage has been placed to ask cyclists and boarders not to use the paths.**

We all enjoy watching the ducks and ducklings. Concerns have been voiced about “people” food being fed to them. This is highly unhealthy and **signs have been placed reminding us of that.**

As we move into the next phases of our pandemic, there are many unknowns. We do know that social distancing will continue with us. It is reassuring to see social distancing occurring on the walkways. We do not know when this will be end, but social distancing is a simple act that can assist in maintaining a safe outdoor environment. **Signage has been placed in walking areas to remind everyone to social distance, to be safe and healthy.**
