

Safety / Security Report to Board

April 23, 2023

The committee has received a letter from Board member Marie Evans expressing continued concern about speeding cars on GVW, and the lack of cars who honor the stop sign located at GVW and Creekside. She is suggesting that speed bumps be placed between Larch and the Gazebo circle, and the stop sign on GVW (east to west) be changed out to a yield sign. This would leave the two stop signs on Creekside. Also noted was the absence of speed limit signs from the Larch entrance.

The committee acknowledges that this is a concern that requires serious consideration. It is recommended that 2 speed bumps be placed between Larch and the Gazebo Circle, on GVW, and the preferred method would be having the asphalt company provide this while working on projects this summer.

These is definitely a need for speed limit signs in this location.
