

Dear neighbor,

2024 has been a very challenging year in many ways including health and management of complex infrastructure issues for our association.

Taking on the responsibility of a director's position places a significant burden on any individual, but doubly so when we are managing infrastructure, finances and litigation as is the case in VGC MPMA.

Ultimately, I have a personal commitment to public service. After a successful career as an electrical and systems engineer, I choose to contribute back to society and help the community using those professional skills.

So, I have decided to run for office in 2025 and trust you, the homeowners, to decide if I acted in a responsible, accountable and honest way over the past 12 months.

Happy holidays.

Respectfully

Dave Siviter
